This worksheet shows all fields found on different types of paper Receipts (i.e. Orders) , and how they relate to one another.

Fields that are ~~struckout~~ would not applicable.

Fields in **blue** or **red** show additional fields not found in the base fields found in GENERAL.

If you combined all different Categories, most fields would fold up into each other, with some fields being Null. In addition, though, there would be several fields of these fields in **blue** or **red** that would need to be added or handled another way.

As you can see, it appears that OrderDetails fields do not apply to Utilities except for Television.

This assumes, of course, that a single field like "GRT Surcharge" or "Electric Total" would be located in the parent table (tblOrder) and not broken out in the child table (tblOrderDetails).
